

FIND+ FERTILITY IN YOUTH LIVING WITH HIV SINCE CHILDHOOD

Are you:

Living with HIV since childhood (<age 10)

16 years of age or older (cis-gender females)

OR

19 years of age or older (cis-gender males & trans-individuals)

Join our study!

The FIND+ study is recruiting men and women living with HIV since childhood to help us learn more about their fertility potential, desires and intentions.

Our study involves the following:

- Females: a clinical visit for a survey and sample collection (blood)
- Males: a sample collection (semen) and online or phone survey.
- An optional survey for all participants on fertility intentions (virtually or online)

A honorarium will be provided to thank you for your time.

The study is confidential and you may withdraw at any time.
